Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/348,320

Applicant(s)

PIERONI ET AL.

Examiner

Charles D Garber

Art Unit

2850

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 July 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,3,19 and 21-24 is/are pending in the application.
- 4a) Of the above claim(s) 4-18 is/are withdrawn from consideration.
- 5) ☒ Claim(s) 19 and 21-24 is/are allowed.
- 6) ☒ Claim(s) 1 and 3 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other:

Art Unit: 2850

DETAILED ACTION

Phone message from Applicant's Attorney, Moreland Fischer reported that the Gilles reference used in non-final rejection in Examiners earlier office action, paper number 13, did not predate the instant invention priority date. Therefore, the prior rejection is hereby withdrawn and a new non-final rejection is submitted. Furthermore, the shortened statutory period for reply is reset to expire three (3) months from the mailing date of this action.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pieroni et al. (US Patent 5,922,944) in view of Chu et al. (US Patent 5,849,596).

Regarding claim 1, Pieroni et al., henceforth referred to as "Pieroni", discloses a smoke producing apparatus and operation for detecting leaks in a fluid system including a smoke producing chamber 1 which appears in figure 1 to be closed, and a fluid supply 2 preferably of Citgo synthetic PAO oil, which is known to be flammable at 480°F.

Pieroni also discloses a heating grid 4 shown in figures 1 and 5 to be within the chamber, a gas inlet tube 16 with orifice 18 for blowing gas and fluid mixture against the heating grid energized by DC current (column 3 line 66 to column 4 line 10), an air outlet 14 for removing the exiting smoke (column 3 lines 16-23), and a source of air 25 which is a gas.

Pieroni et al. however does not expressly teach the gas is Nitrogen, which is inherently a non-combustible gas.

Chu discloses a smoke generator wherein there is taught the use of nitrogen, or any other suitable gas that would not deteriorate the smoke, as a gas for blowing smoke.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use Nitrogen to blow smoke as Nitrogen will not deteriorate smoke.

The structural arrangement of Pieroni is identical to the arrangement of the instant invention and will inherently prevent dieseling within the closed chamber as in the instant invention when using nitrogen as a propellant advantageously taught by Chu.

As for claim 3, Pieroni et al. further disclose an air inlet tube 16 shown in figure 1 and 5 extending through and above the fluid supply 2 as in the instant invention. The tube also blows a mixture of gas and fluid against the heating grid 4 as in the instant invention (column 3 line 66 to column 4 line 10).

Allowable Subject Matter

Claims 19, 21-24 are allowed.

The following is an examiner's statement of reasons for allowance: Prior art does not disclose or suggest as in claim 19 a method for generating smoke for use at a volatile, potentially explosive environment, comprising the steps of:

locating a supply of flammable fluid within a closed smoke producing chamber, said closed smoke producing chamber having a gas inlet to receive a supply of noncombustible nitrogen gas under pressure and a smoke outlet to permit smoke to exit said closed smoke producing chamber;

locating a heating element within said closed smoke producing chamber so as to extend in spaced alignment with said supply of fluid; supplying said non-combustible nitrogen gas under pressure to said closed smoke producing chamber via said gas inlet for blowing a mixture of said non-combustible nitrogen gas and said supply of flammable fluid against said heating element; energizing said heating element for

vaporizing into smoke said mixture of non-combustible nitrogen gas and said flammable fluid that is blown against said heating element, said non-combustible nitrogen gas preventing dieseling within said closed chamber and the possibility of an explosion at the volatile, potentially explosive environment at which the smoke will be used; and

removing said smoke from said smoke producing chamber to the volatile potentially explosive environment via said smoke outlet.

In particular, the prior art relevant to leak detection and smoke generation fails to teach the use of nitrogen as a propellant or carrier gas in order to prevent pressure induced ignition or dieseling.

Claims 21-24 depending from allowed claim 19 are allowed for the same reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2850

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Kell and Scott references provide other example of using Nitrogen in the generation and conveyance of smoke.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles D Garber whose telephone number is (703) 308-6062. The examiner can normally be reached on Monday to Friday, 7:00 AM-3:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams can be reached on (703) 305-4705. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7725 for regular communications and (703) 308-7725 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-4900.
